

2019 Conference announcement

Daniel Zink

Institute of Bioengineering and Nanotechnology, Singapore

Conference Series “**21th World Congress on Pharmacology and Toxicology**” which is going to be held at during **August 26-27, 2019** at **Dublin, Ireland** with a theme of Broaden the possibilities of pharmacology and toxicology

The aim of pharmacology and toxicology is to promote the all the delegates from Universities and Institutes to interact with the top grade world class Scientists and a great opportunity for all the speaker's, delegates etc.,

The World Congress on pharmacology and toxicology is an international peer-reviewed journal in the field of pharmacology and toxicology.

This conference plays a Global platform for pharmacology and toxicology companies, start-ups, clinical research divisions, professionals, specialists, consultants, doctors, scholars and students to frame new relationship and strengthen the Knowledge.

PR:-Conference Series organize the World summit on World pharmacology 2019 which plays a major role on pharmacology and toxicology. Pharmacology is combining of fields like biochemistry, toxicology, genetic engineering, molecular engineering and its advancement using nanotechnology. pharma includes health care addition to drug development and discussed research and innovative works in the pharmacy field. As this conference, the international convention, B2B meetings, international workshops will also be organized to discuss the specific topics in the field of pharmacology and toxicology.

The Conference plays a Global flat form for professionals, teachers, students, doctors , researchers etc.,and the conference gives the more knowledge from the current research program which tells about the different transplantation techniques and storing of pharmacology and toxicology , so that it is more useful for the Current research programs.And the Conference attendees also get attracted towards the conference speeches and other special events by this it gives good flat-form for the students, researchers, scientist and other delegates for

further more prestigious pharmacology and toxicology programs to share their ideas.

And also the research program gives the opportunity to the young researchers through their poster presentation, video presentation and scientific meetings.

All these were published in the journals of Cardiovascular Pharmacology: Open Access | World Pharmacology 2020, Journal of Clinical & Experimental Pharmacology | World Pharmacology 2020 Conference Highlights:

- Pharmacokinetics and Pharmacodynamics
- Pharmacotherapeutics and Drug Toxicity
- Drug Discovery, Development and Posology
- Novel Drug Delivery System (NDDS)
- Genetic and Molecular Toxicology
- Neuro and Cardiovascular Pharmacology
- Immunopharmacology and Immunotoxicology
- Food and Nutritional Toxicology
- Recent Advancement in Pharmacology and Toxicology
- Drug Toxicology and Interaction

Acquire the knowledge by attending the Speaker session entitled “Accurate high-throughput prediction of human organ-specific toxicities of test compound” by “Daniel Zink” under the session “Toxicology”.

Supporting Journals:

- Biochemistry & Pharmacology
- Journal of Cellular and Molecular Pharmacology
