

Antibiotics: Discovery & Development scheduled in New York, USA during October 07-08, 2020

Alice Genyi

Professor, Medical University of Lublin, Poland, E-mail: samvaknin@gmail.com

Hilaris Conferences invite you to be a part of the Antibiotics: Discovery & Development conference in New York, USA on October 07-08, 2020 to provide an exclusive platform for upcoming researchers, scientists, students and educators to present and discuss the latest innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the microbiology field is highlighted with the theme "Revolutionary developments in antibiotics".

Antibiotics are a category of antimicrobials used in the treatment and prevention of bacterial infections. They may inhibit or kill the growth of bacteria. Many antibiotics are also effective against protozoans and fungi; some are toxic to animals and humans also, even when given in therapeutic dosage. Antibiotics are not effective against viruses such as influenza or a common cold, and maybe harmful when taken inappropriately. Hilaris Conferences on Antibiotics: Discovery & Development 2020 provides the chance to discuss quite innovations in Antibiotics such as the inclusion of Conventional and Non-Conventional Strategies to Fight Resistant Bacteria.

This conference aim is to bring together leading Doctors, Academic Scientists, Researchers, Students and major companies to share their experiences and research results in their on-going project in Antibiotics and its application. We consider this a fantastic occasion to attend this conference along with your research member(s), with a view to conducting an exclusive session to discuss the novel technologies and innovative methods in your area of expertise.

In addition to Speeches, Posters presentations, Workshops, Exhibitions and Discussions, the conference also offers an unparalleled time for renewing professional relationships, for networking and for keeping up-to-date with variations in your challenging and expanding research work.

Major Sessions are: Antibiotics | Antibiotics and their interactions | Antibiotic Resistance | Antibiotics by Drug origin | Types of Antibiotics | Current research in antibiotic resistance | Infection Diseases | Clinical Trials of Antibiotics | Antibiotic Production and Delivery Method | Antibiotics for Emerging & Re-Emerging

Diseases | Developing Alternatives to Antibiotics | Drug Discovery Technologies in Antibiotics | Applications of Antibiotics | Antibiotics Overuse and Resistance | Antibiotic-resistant Bacterial infections | Microorganisms Producing Antibiotics | New antibiotics and non-antibiotic approaches | Antibiotics: Uses, Side effects, Allergies and Reactions | Antibiotic Treatment and Advances | Antibiotic Use in Animals.
