3rd International Conference on Healthcare Informatics and Wellness May 11-12, 2020 Webinar

We had a huge success with the completion of **3rd International Conference on Healthcare Informatics and Wellness** on May 11-12, 2020. The significance of the meeting was achieved due to the accumulation of all the related group of spectators of research scientists to share their Knowledge, Research work, Technologies, and furthermore trade of worldwide Information towards the correct crowd at ideal time. Webinar has received a generous response from all over the world. This has been organized with the aim of endorsing the development of new perceptions and ideas for investigating the high level of knowledge reached by scientific community in the field of Healthcare Management.

The conference was organized around the theme “***A Step towards better Healthcare Systems for control of Covid-19***”. The congress entrenched a firm relation of future strategies in the field of Healthcare and Healthcare Informatics.

We would like to thank all the participants and following Speakers:

- Andriy Hospodarskyy, Ternopil Medical University, Ukraine
- Andriy Tsvyakh, Ternopil Medical University, Ukraine
- Ismaeel Almakrami, Health Management and Informatics Consultant Najran Health Affair, Najran, Saudi Arabia
- Amandeep Kaur, research scholar at Panjab university, India

We would like to thank each participant of Healthcare IT 2020 webinar to make this a huge success. And special thanks to media partners for the promotion of our event.

The **Conference Series** Healthcare Conferences aim to bring together the prominent Researchers, academic scientists, and research scholars to exchange and share their experiences on all aspects of Healthcare. It is conjointly a knowledge domain platform for researchers, practitioners and educators to gift and discuss the foremost recent advances, trends, and issues in addition as sensible challenges and solutions adopted in the fields of Healthcare.

PEPITOMETRO: VIRTUAL PAGE TO COMBAT CHILDHOOD OBESITY AND OVERWEIGHT

Donovan Casas Patiño, Alejandra Rodriguez Torres, Maria de los Ángeles Maya Martínez and Yuridia Sánchez Repizo

Universidad Autonoma del Estado de México CU Amecameca

Abstract

Mexico occupies the first place worldwide in childhood Overweight and Obesity [OySP], in this context there have been multiple proposals to combat OySP, from invasive clinical models to food policies such as food labeling and calorie reduction in food, and even Thus the problem of OySP is increasing, so we devised a virtual page proposal which, through translation of the knowledge of experts in the area under study, we propose the creation of the Pepitometer, which functions as the diffuser instrument of the knowledge of styles of healthy life in this age group, through two parameters scientific awareness of knowledge translation and availability of information, this makes in children behavioral appropriation towards healthy lifestyles through the promotion of these contents in the family nucleus. It is worth mentioning that this page was piloted in a group of 300 children between 8 and 12 years old, of which 69% on admission to the page presented OySP, 7% malnutrition and 24% normal weight, in a period of 2 months 6,000 visits were registered by registered users, the most visited portals, Menu of the week [30%], Pepitometer function [30%], physical activity [20%] and games [20%], at the end of the cross section After two months, we found 77% of OySP, 6% malnutrition and 17% normal weight this in registered users, this shows that the trend remains static, in two dichotomous slopes of the country, OySP and malnutrition, this page Pepitometer, It is a tool that can be very useful for monitoring and combating these global pandemics, which depend on social Nutrition.

Doctor, Family Medicine Specialist, Master in Population and Health, Doctor in Collective Health, Postdoctor in Social Anthropology, Postdoctor in Medical Anthropology, Postdoctor in Politics and Health. He is a professor at the Autonomous University of the State of Mexico and the Intercultural University of the State of Mexico. Lines of academic activity: Collective Health.
