

Editorial Note

3rd International Conference on Healthcare Informatics and Wellness May 11-12, 2020 Webinar

We had a huge success with the completion of **3rd International Conference on Healthcare Informatics and Wellness** on May 11-12, 2020. The significance of the meeting was achieved due to the accumulation of all the related group of spectators of research scientists to share their Knowledge, Research work, Technologies, and furthermore trade of worldwide Information towards the correct crowd at ideal time. Webinar has received a generous response from all over the world. This has been organized with the aim of endorsing the development of new perceptions and ideas for investigating the high level of knowledge reached by scientific community in the field of Healthcare Management.

The conference was organized around the theme “*A Step towards better Healthcare Systems for control of Covid-19*”. The congress entrenched a firm relation of future strategies in the field of Healthcare and Healthcare Informatics.

We would like to thank all the participants and following Speakers:

- Andriy Hospodarskyy, Ternopil Medical University, Ukraine
- Andriy Tsvyakh, Ternopil Medical University, Ukraine
- Ismaeel Almakrami, Health Management and Informatics Consultant Najran Health Affair, Najran, Saudi Arabia
- Amandeep Kaur, research scholar at Panjab university, India

We would like to thank each participant of Healthcare IT 2020 webinar to make this a huge success. And special thanks to media partners for the promotion of our event.

The **Conference Series** Healthcare Conferences aim to bring together the prominent Researchers, academic scientists, and research scholars to exchange and share their experiences on all aspects of Healthcare. It is conjointly a knowledge domain platform for researchers, practitioners and educators to gift and discuss the foremost recent advances, trends, and issues in addition as sensible challenges and solutions adopted in the fields of Healthcare.

Safety of online digital pharmacy providers: a review analysis across the United Kingdom and France

Hanine Estephan

Harvard University, USA

Abstract

Online pharmacies enabled consumers to obtain prescription medications with a click of a button. While some countries such as UK and US are trying to regulate these providers, France decided to ban them. A systematic review was carried out to assess the level of safety and effectiveness of these online providers in the UK, and France. Electronic searches were conducted to identify active legal and illegal providers in these two countries. Multiple databases were searched including: pubmed, Care Quality Commission online database, general pharmaceutical council, and DREES (des données de la Direction de la recherche, des études, de l'évaluation et des statistiques (DREES)). Our analysis suggests that existing regulations should be revised; ongoing frequent inspection is to be advised and stricter control measures should be implemented to ensure the delivery of safe and effective services. Providers offering high quality and safe services should be further promoted and rewarded.
