

## Young Researcher Forum – 3<sup>rd</sup> Global Congress on Antibiotics, Antimicrobials & Resistance, Rome, Italy, June 15-16, 2020

**Dinesh Jaiswal**

Pharmaceutical Consultant, Pharmaceutics, USA, E-mail: [dmjaiswal@gmail.com](mailto:dmjaiswal@gmail.com)

The aim of the Young Researchers Forum is to motivate and bring in together young researchers in the field of Antibiotics and Antimicrobial Resistance. [Antibiotics forum](#) offers a vibrant place for examining potential and ongoing investigation in any stage, from idea to results. The forum strives to offer a friendly environment to permit young researchers to get opinion on their work, exchange experience, ask questions, investigate pathways open to them.

In addition, the forum promotes collaboration between young researchers, knowledgeable researchers and industry. Each author, in addition to reviewers applicable to their work, will be assigned an industrial mentor who will also review and suggest enhancements to their submissions. Participation is accessible to anyone who believes them as a 'young' researcher, aiming to contribute to research ideas and (preliminary or mature) outcomes with their peers and looking for an chance to inspire and be inspired and understand about research paths. Ph.D. candidates, young researchers in any stage of their investigation (including undergraduate students), young researchers in business research pathways are all most accepted to participate. In addition, we precisely invite Ph.D. candidates and young researchers presenting their work in Antibiotics and Antimicrobial conference to participate in this forum.

To recognize the outstanding effort by student participants, the Best YRF Presentation award will be offered for an exceptional presentation of the [Antibiotics conference](#), and the award winner must be enrolled as a post-graduate student. The award is suggested based upon an outright standard of brilliance and all student presenters will be considered eligible for this award. But based on the scores provided by the evaluation committee for every presentation of student presenters of the conference, the Conference Chair determines which presentation will collect the Best YRF Presentation Award.

### Submission via two ways:

**Ongoing research papers:** Presenting formerly unpublished motivations, goals, primary results, planned next steps, and industrial influences of an ongoing research

**Research abstracts:** Outlining (preferably more

mature) research of young authors, who would like to energetically engage in the forum.

In both types of proposals, we challenge the authors to believe about the potential impact of their study on industrial practice (whether in the near or far future based on the nature of the research), and to contribute a section to the Business Impact of their work. The authors of ongoing research papers will be given an industrial mentor who will evaluate the industrial impact of their work, and inform on possible impacts that the authors may be missing. The mentor's feedback will require to be manifested in the revised submission as a condition to the paper being accepted.

### Benefits of attending:

- Networking Opportunities, Grow Your Professional Network
- CPD accreditation
- Meet Experts & Influencers Face to Face
- For Speakers, the Accepted abstracts will be published in the indexed journals
- Global exposure of their research
- Break Out of Your Comfort Zone
- Build Your Knowledge Base
- Expand Your connections and resources
- Learning in a New Space

### Importance of Attending:

[Antibiotics Summit](#) offers the greatest prospect to encounter distinguished speakers and sponsors, to network and collaborate with scientists and researchers. Our major focus is to enhance and support the research work, exchange ideas and methodologies.

This Congress holds Oral presentations, Poster presentations, Workshops, Symposiums, and Young researcher forum sessions for the participants. Students can avail their slot under the young researcher forum category, the best presenter will be recognized with a memento.

Speakers can join with their respective research teams so that they can organize/conduct workshops or symposia during the conference. The B2B meetings are also arranged with renowned scientists to network and

develop their professional contacts.

We Welcome all the Young researchers out there to participate in our event 3rd Global Congress on Antibiotics, [Antimicrobials and Resistance Congress](#) at Rome, Italy on June 15-16, 2020
