

ENDOLIFT AND ULTHERAPY® FOR THE BEST FACE, NECK AND BODY NON-SURGICAL LIFTING

Roberto Dell'Avanzato

L'Albereta Relais & Chateaux & Espace Chenot Health Wellness Spa, Italy

Background: We evaluate the results after 13 years of Endolift Laser technique for the soft rejuvenation of face, neck and body, using a very thin optical fibre connected to a 1470nm diode laser, combined in the last years with Ultherapy® which allows in a single session to lift the muscles and the skin.

Methods: We report our experience after more than 4000 areas treated with Endolift for the treatment of skin laxity of the face, neck and the body. A 200-300 micron fiber is used for the face and the neck; a 400-600 micron fiber is used for the body. The fiber was easily inserted, without incisions under the skin directly in the superficial hypo-derma. After Endolift, a Ultherapy® session is performed.

Results: The areas of skin laxity of the face, neck and body, can benefits from the possibility that the Endolift Laser has to retract the skin and remodel the derma, activate the collagen production, stimulate the neo-angiogenesis. Ultherapy® helps to obtain the maximum result possible working more deeply the middle and deep hypo-derma up to the muscular fascia, permitting to obtain an immediate and a long-term lifting.

Conclusions: Endolift laser combined with Ultherapy® is the best non-surgical treatment for the areas of muscular and skin laxity of the face and the neck.

Biography

Roberto Dell' Avanzato is a Specialist in Surgery with a University Master in Aesthetic Medicine and Surgery. He is a Professor of laser and laser assisted liposuction at San Marino University (San Marino). He has completed his University Diploma in Laparoscopic Surgery from Louis Pasteur University of Strasbourg (France).
