Simple and effective profiloplasty

Juan A Mira

Clinica Doctor Mira, Spain

Rhinoplasty is undoubtedly the most compromised of all cosmetic surgery interventions. Each patient has personal features and therefore requires a totally personalized nose, adapted to his face, and that shall be unique in all parameters. We review here a basic rhinoplasty, after we performed 4000 without pretending to exhaust possibilities: first visit, exploration, photographs, image digitalization, preoperative analytical study, hospital, operating room, anesthesia, assistants, immediate discharge, final discharge and following reviews. In brief, all things that can help all those who start in this difficult art will complement this by explaining the bases of the profiloplasty: how can we combine rhinoplasty with an elevation with a lip lift and chin reshaping with an autoimplant to obtain an excellent result.

Biography

Juan A Mira is a Plastic Surgeon since 1975 from Valencia, Spain. He has published his first work on "Mamoplastia aumentativa via transareolar inferior: 100 casos" (Revista de Cirugía Plástica Ibero-latinoamericana), in 2003 his revolutionary innovation in breast prostheses "Anatomic Asymmetric Prosthesis: shaping the breast" (Aesthetic Plastic Surgery) and in 2010 his "Anatomic Bilateral Contour Mammary Prosthesis: ABC"
