

Market Analysis on EuroNeuro 2020

Aage Moller

Founder & Professor, The University of Texas at Texas, USA, E-mail: amoller@utdallas.edu

[EuroNeuro 2020](#) welcomes attendees, presenters, and exhibitors from all over the world to Rome, Italy. We are delighted to invite you all to attend and register for the “**29th Euro Neuro Congress on Neurologists & Neuro Science Education**” which is going to be held during March 06-07, 2020 at Rome, Italy. The Organizing Committee of [EuroNeuro 2020](#) has been planning for an notable scientific program which includes plenary lectures, symposia, workshops on a variety of topics, poster presentations and various programs for participants from all over the world.

The Congress speaks about different aspects of Neuro Science Education like Neuro Oncology and CNS, Neuro Ophthalmology, Neuro Science and Artificial Intelligence, Brain Mapping, Brain Disorders and Pathophysiology, Brain Tumours and Gliomas which could help you to connect with global experts in these fields and ultimately provide a networking platform to collaboration and connect with global health care companies.

Why in Rome?

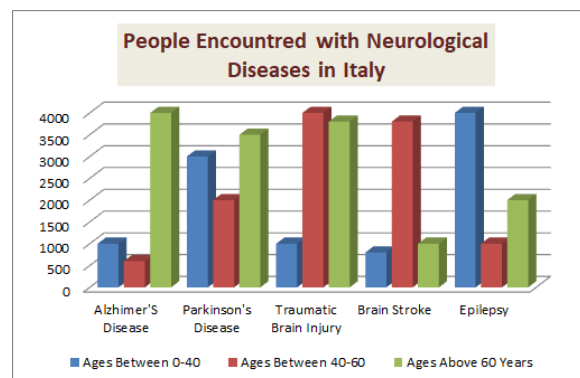

Rome is not only the city of celebrated destinations, but it is also known as the city with maximum literacy rate. The origin of the word "university" is actually attributed to Rome. Adult expats living in Rome have ample of opportunities to broaden their educational horizons. Rome has four public universities with an estimated student population of over 200,000. In reality [Neuro Science](#) and [Artificial Intelligence](#) is more fitting for scientists and researchers since it is necessary in today's globalized world if one wishes to stay competitive in the field of Neurology.

For further details:

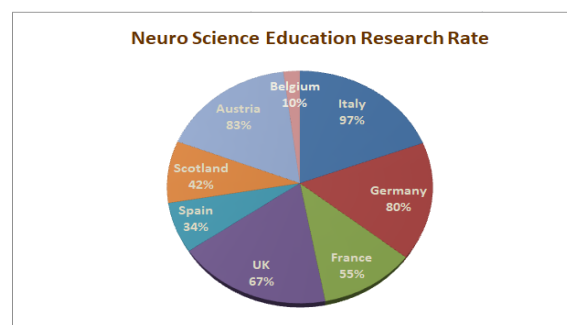

Analysis of Neuro Science Education:

Among 2,00,000 population, every year there are 60,000 people who are getting diagnosed with Neurological Disorders and 30% of hospitalized cases are also for these neurological disorders and Brain tumours mostly like stroke, epilepsy and [head injury](#). Across the globe there were 46 million [Alzheimer's patients](#) and only in Italy over 4 million people are suffering with some type of dementia and the number is estimated to rise to about 131.5 million by 2030. Increasing occurrence of these malicious disorders like Parkinsonism and Alzheimer's disease together with other inherited CNS disorders has resulted in increased necessity for new improvements in neuroscience

industry. The Italian Marketing is planning to increase the laboratories and academic centers over a forecast period to decrease the diseases rate and to meet the demand owing to a growing need for better treatment and medication.

This is an Italy graphical analysis which speaks about the different age group of people getting affected from Neurological Disorders for every 2 years. The above analysis clearly shows that Alzheimer's and Parkinson's are the disease which are mostly triggered within the people of age group above 60 years where as [Epilepsy](#) is found in the age group of people below 40 years majorly. While in the case of Traumatic Brain Injury and Brain Stroke middle age group of people between 40-60 years were affected mostly.

This Pie analysis tells us about the [Neuro Science](#) Education research rate in Italy in comparison with other European Countries. From the above analysis it

can be concluded that Italy is the Country with 97% research in Neuro Science Education preceded by Austria with 83% and followed by Germany as 3rd position with 80% of neuro research rate. UK, France, Scotland and Spain are with developing research percentages in terms of Neurology Education whereas Belgium is still in the race of developing Neuro Science research among the rest of the European Countries.

Glance of Global Neurological Associations:

- World Federation of [Neurology](#)
- American Academy of Neurology
- American Neuropsychiatric Association
- Neuropathy Association
- Alzheimer's Association
- British Neuroscience Association
- Society for Behavioral Neuroendocrinology
- The Brain & Behavior Research Foundation
- International Society for Autonomic Neuroscience
- International Behavioral Neuroscience Society
- International Behavioral and Neural Genetics Society
- Federation of European Neuroscience Societies
- Society for Social Neuroscience
- Brain injury association of America
- International Brain Research Organization

Top Neuro Science Universities in Italy:

- Sapienza University of Rome
- The University of Pavia
- Alma Mater Studiorum - University of Bologna
- University of Trento
- University of Padua
- University of Trieste
- Scuola Normale Superiore of Pisa- University of Pisa

Hospital Working on Neuro Science Education across the Globe:

- Ram Psychiatry Hospital
- Helwan Psychiatry Hospital
- Clinique Axium
- Royal Edinburgh Hospital
- St. Patrick's University Hospital
- Metro Psych Facility
- DelaCerna Hospital
- Aged Psychiatry Services
- The Ashburn Clinic
- Peace Health Ketchikan Medical Center
- Royal Alexandra Hospital Psychiatry
- Amager Hospital
- World Brain Center Hospital
